SUMMARY

Full stack software engineer with 2 years of professional experience building web applications, RESTful APIs, and desktop apps with TypeScript, JavaScript, React, Next.js, Node.js, Laravel, and FastAPI. Experienced across the full software development lifecycle, from relational database design (PostgreSQL, MySQL) and multi-tenant SaaS architecture to responsive frontends, background job processing, Docker, and AI integrations with the OpenAI API. Comfortable owning features end to end, from client requirements to deployment.

WORK EXPERIENCE

Software Engineer | Hipe Japan Inc. | 2024 – 2026

- Developed an AI-assisted content management system using FastAPI, CakePHP, and MySQL, integrating OpenAI and Perplexity APIs to generate SEO strategies, audience personas, written content, and banners.
- Developed a Node.js and Express REST API for Japanese-language search autocomplete and keyword classification, including batch processing for large keyword sets.
- Migrated a legacy VB.NET application to the web using a Next.js frontend and Laravel REST API.
- Maintained and enhanced FastAPI and Next.js applications by developing new features and refactoring existing code for improved readability and maintainability.
- Developed RESTful APIs and responsive web applications using React, Next.js, and Nuxt.js based on client requirements and system specifications.
- Containerized applications and services with Docker and collaborated with the development team through Git feature branches and pull request code reviews.

Software Engineer Intern | Hipe Japan Inc. | 2024

- Developed the REST API using Express.js and TypeScript and implemented core React features for a learning management system (LMS).
- Designed the MySQL relational database schema and collaborated with the intern development team through Git pull requests.

PROJECTS

- **Pickle Reserve:** Multi-tenant pickleball booking SaaS built with Next.js, TypeScript, PostgreSQL (row-level security), Redis, and BullMQ, featuring court reservations, tournaments, subscription billing, and automated SMS notifications.
- **Lumen Worship:** Offline-first worship presentation app built with Next.js, React, TypeScript, and Electron that ships as a web app and Windows desktop app from one codebase, with SQLite and IndexedDB storage.
- **DevKit:** Browser-based developer utilities for text and structured data, built with Next.js, TypeScript, and Tailwind CSS (devkit-tool.netlify.app).

EDUCATION

Bachelor of Science in Information Technology | Cebu Technological University | 2020 – 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL, HTML, CSS
Frontend: React, Next.js, Nuxt.js, Vue.js, Tailwind CSS, shadcn/ui, Electron
Backend: Node.js, Express.js, FastAPI, Laravel, CakePHP, RESTful APIs
Databases: PostgreSQL, MySQL, SQLite, Redis, Drizzle ORM
DevOps and Tools: Git, GitHub, Docker, VSCode, Postman, BullMQ, Railway, Netlify
AI Integration: OpenAI API, Perplexity API, LLM Integration
